

Leader's Quest: Cadette “The Carbon Crown Heist”

Theme: Environmental Action, Innovation, and Community Change

Cadette Badges Integrated:

Breathe Journey

Entrepreneur

Outdoor Art Apprentice

Boss Name: *Queen Smogara, The Smothering Sovereign*

She's stolen the mythical *Carbon Crown*—a relic that once kept the world's air clean and skies vibrant. Her fog blankets neighborhoods, stifles creativity, and dulls nature's voice. She thrives when people say, “*It's too big to fix.*”

Boss Weakness: Creativity, entrepreneurship, and collective action.

Strategy Options:

1. Design a Campaign for cleaner air or sustainability (*Breathe Journey*).
2. Invent a Green Product that solves a real-world issue (*Entrepreneur*).
3. Create Outdoor Art that raises awareness or celebrates nature (*Outdoor Art Apprentice*).

Choose Your Role:

- The Eco Inventor – Solves problems with upcycled magic and clever design.
- The Change Catalyst – Turns awareness into action with posters, pitches, or campaigns.
- The Nature Muse – Channels the outdoors into activism through visual storytelling.

Quest Log: Task

Identify a local air/environment issue and design a creative way to raise awareness.

Prototype a product or service that reduces waste, saves energy, or helps people live greener.

Make an outdoor art piece (sculpture, chalk, installation, photo, etc.) that tells a story.

Track your personal impact (car rides skipped, plastic avoided, items reused) for a week.

Present your ideas to at least one other person and get feedback.

Reflection:

- What role do I want to play in protecting the planet?
- How can I be both creative *and* practical when solving problems?
- Why is sharing my ideas an important part of change?

Victory Stamp:

Sketch a crown made of leaves and wind—or a green flame igniting in the palm of your hand.
